

Industry:

Mining

Plant:

Washing plant

Lining System:

K-ALOX lining

K-ALOX LINED DEWATERING CENTRIFUGE

Key Benefits

- ✓ A bespoke system supplied and installed
- ✓ Superior quality of ceramic liners
- ✓ Minimal cost to improved Performance ratio
- ✓ Fit and forget

Problem

Dewatering centrifuge used within washing plants for the mining sector, subject to high levels of wear due to the increased amounts of coarse/contaminated material handled by the equipment. As the equipment was not lasting as long, the OEM approached Kingfisher to offer a system to help enhance the surface within the centrifuge which would help add value to the equipment itself.

Solution/Benefit

Following consultation, Kingfisher advised the OEM to repair their existing centrifuges and line them with Kingfisher's 92P K ALOX ceramic lining system. Kingfisher have been offering this service since 2011, and have been involved in many projects for the OEM, for a number of different sectors.
